DXpedition News

Rotuma - 3D "Bing" Crosby VK2BCH changed his plans, and is now active from Rotuma (OC-060) as **3D2XV** for 3-4 weeks. Bing operates SSB only, including checking into nets on 40 and 20 meters. First spots show him on 7056, listening 7180 kHz, at 0745Z. QSL via home call, direct only.

Cambodia - XU F6IRF is now signing **XU8CW**. Try 14032 kHz at 1345Z, 14235 at 1400Z, and 18075 at 1530Z. QSL via FD1GTR.

Belize - V3 Ken Crandall KF4CI is operating as **V31CT** until June 12, from Turneffe Island (NA-123). 80-10 meters, CW and SSB, concentrating on 17 and 30 meters. QSL home call.

Crete - SV9 Morten Antonsen LA9GY is active to June 21st, on 20, 15, and 10 meters, SSB and CW. QSL via home call. Callsign not yet known.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Islands On The Air

- **CT1CBI/p** is on Baleal I. (EU-040); QSL home call.
- **EJ0SI** is active from Saltee (EU-103) to June 14.
- **G0KJV/EA5** is active this week from Benidorm (EU-093).
- **4K4BVI** on Vize I. (AS-055) likes 20-meter CW. QSL via UY5XE. (DXNS.)
- **FF1NIP/p** will operate from Sein I. (EU-068) June 19-21. Try 3529, 7029, 14053, 21053, and 28029 kHz on CW, and 3729, 7053, 14229, 21229, and 28429 kHz on SSB.
- **KK6ZO** will operate from the Santa Cruz Islands (NA-144) June 12-14. Try the IOTA frequencies, plus 7260 kHz for the West Coast. QSL home call.
- **4K3/RZ1OA** will operate from Morzhovets I. (EU-119) for four months.
- **FF1NEH/p** is an operation by FD1JYD from Embiez I. (EU-???) June 13-14.

Shortly Noted

- **FW1FM** is on Futuna (OC-118); try 17M at 08-1000Z.
- **HH2PK** on Haiti has been on the new bands. Try 10103 kHz at 1045Z, 18150 at 1330Z and 1830Z, and 24950 at 1130Z.
- **JA3GEP/JD1** is on from Ogasawara (AS-031) June 15-17.
- **A22MN** Dave Heil (ex-9L1US) is usually on Saturdays on 28469 kHz at 1300Z, and 21327 kHz at 1430Z, with a sked with QSL manager WA8JOC. **J5AUI** joins him there.
- **G3NOM** Ray Gerrard, who has been active as **HS0AC** will operate **/JT1** and **/JT4** June 28-July 8. He had plans to operate as **XU1NOM** in late July, but political problems may force a change in plans. (DXNS.)
- **SO9XX** is active from Poland June 14-24, by DL4OK, SSB only. All contacts will be confirmed via the bureau.
- **S79EC** by DF3EC is due on now, but no reports as of June 8. DF3EC left Germany May 28, aiming for 3B8 and other Indian Ocean spots. He operates CW only.
- **D2AABC** and **D2AZPD** are new stations that has been checking into the net on 14256 kHz at 0000Z, and working Brazil on 14263± kHz at 1900Z.
- **CQ, CR,** and **CS** prefixes are in use in Portugal until the end of July, celebrating 500 years of Portuguese discoveries. Call areas 1,3,4,5,6,7, and 8 count for Portugal.
- The next **SAREX** space mission is scheduled to launch June 22. The low-latitude orbit of the 13-day mission means that few passes will be over the US or Europe. Dick Richards KB5SIW and Ellen Baker KB5SIX will sign **W5RRR-1** on packet. (ARRL Letter.)
- **4A3NMP** is a Mexican special call from a replica of one of Columbus' ships, until Oct. 12. QSL XE1MX. (DXPress.)
- Likewise **CT1DSG/MM** is aboard a replica of the 15th-century Caravel. Try 14180, 21180, and the net on 21335 kHz at 1900Z. QSL home call.
- **XJ3S** is a special-event station June 29-July 12, celebrating the 200th anniversary of the first Lieutenant Governor of Upper Canada at Niagara, John Graves Simcoe. QSL via VE3VM, P. O. Box 692, St. Catherines ON L2R 6Y3, Canada. (US funds and postage okay.)
- **SSB Net** check-ins: **14222**: (0030Z) AM7AAL PJ2HB 4N2PM HB9HVD KH7/KH6JEB CP1DM; **14227**: (11,22Z) 3B8AD KH2X T20AA 7Q7RM A22RV P29NB C21BR VQ9AC; **14236**: (02Z) YK1AO OJ0/SM0FWW; **14256**: (2330Z) 5Z4BP T53UN SV7BAY/5 YK1AO ; **21335**: (14Z) OD5IZ ZD7CRC S79KMB VR6ID.
- **RTTY**: Regulars: **VR6BX** 21083 kHz at 0045Z; **VP5JM** 14090 0200Z; **UO5OIN** 14085 2200Z Sunday; **UJ8JCQ** 14086± 0300Z; **ES7FQ** 14082 0200Z; **3C1EA** 21091 1615Z; **J88BS** 21085± 1330Z Saturday. **VP8CKB** on South Georgia will accept RTTY skeds via the CE3GDN Aplink on 21074 kHz. Spots: **TA5C** 14083 0030Z; **SU1ER** 21074 0840Z; **4S7EF** 14074 ARQ 1730Z; **3A2EE** 14088 0430Z; **6W6JX** 14082 2120Z; **A45ZX** 14087 0110Z; **A92FQ** 21091 1445Z; **TU2BB** 14076 ARQ 2200Z; **VQ9YA** 14088 2250Z.

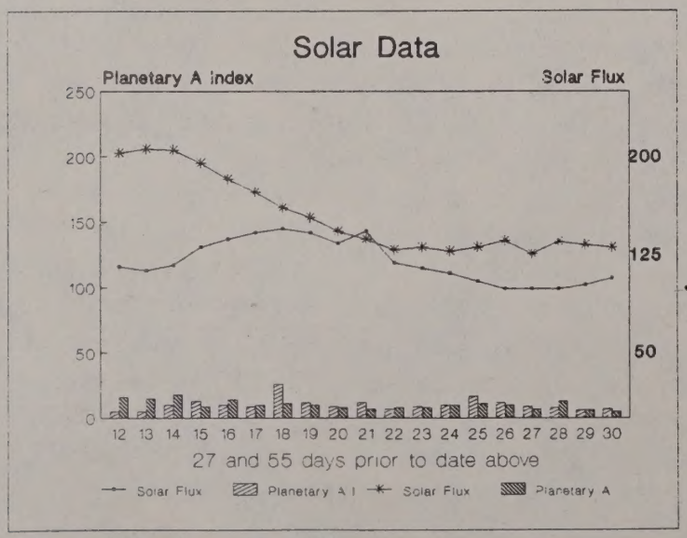
Propagation Watch

The sun continues to be very quiet. A single M-class flare (mid-sized) on June 8 from Sunspot Region 7186 provided a glimmer of hope for increased solar activity. That was the first M-class flare in a month. Region 7186 is magnetically complex, and may yet produce another flare before it rotates to the back of the sun later this week. Region 7192 shows some growth in visible light, but lacks magnetic or hydrogen alpha complexity. All other spots are tiny, and unlikely to produce major flares, nor to boost solar flux.

In real terms, this means that 10 and 12 meters are limited to north-south paths (US to south Africa, South America, and south Pacific, for example). 15 and 17 meters provide some daytime DX, with polar signals very weak. 20 meters remains the best long-haul DX band, with some long-path signals available around local dawn. 30 meters is open much of the night, along the darkness path (to the east). 40 also provides some DX opportunities at night, especially with the very quiet geomagnetic field we have been enjoying. Beverage antennas help to combat the high noise levels on the low bands. Try looking west at local sunrise; some UA0s, JAs, and others are regulars, and provide some indication of band conditions. Good hunting!



Former Yugoslavia

The brief note about possible new DXCC countries from what used to be Yugoslavia in Issue 640 was a bit incomplete, not to mention a typo on the call areas. Here's a more comprehensive (and accurate!) summary of the situation.

The former country of Yugoslavia was composed of six republics and two autonomous regions. Four of those republics have proclaimed their independence from the former federal republic of Yugoslavia. Three of those republics have been recognized internationally: by the European community, the US, and by admission to the United Nations. These actions virtually ensure recognition of these republics as new DXCC countries, based on DXCC Deletion Criterion C: Partition. These three republics are: **Croatia YU2, Slovenia YU3**, and **Bosnia-Hercegovina YU4**. Essentially the only question remaining on separate DXCC status for these three republics is the effective start date. Several dates are possible: proclamation of independence, recognition by the EC, recognition by the US, or some other landmark. (January 1, 1992 might be a reasonable date; it has the advantage of ease of administration.) Whatever date is chosen, **it is in the past**. In other words, contacts with stations in YU2, YU3, and YU4 made **now** will almost certainly count for the new DXCC countries.

However, before you rush to 'move' 4N2s, etc., to different bands and modes, note that ex-Yugoslavia is in the midst of the worst European bloodshed since WWII, with thousands of people killed, cities destroyed, etc. Perhaps we can let the killing stop before we push for contacts.

As to the rest of the country: **YU5 Macedonia** is the other republic to proclaim independence. However, international recognition has been held up by protests from the Greeks, who says they have the rights to that name, from the days of Alexander the Great. Macedonia hasn't existed as an independent country since BC148, but the fact that a dispute is 2000 years in the past is nothing to the Greeks. At some point in the future, the question of the name of the republic will be resolved, and "Macedonia" (or whatever) will have the same status as the above three republics. Again, any reasonable start date will be in the past.

The only remaining fragments of former Yugoslavia are the republics of **Serbia YU1, Montenegro YU6,** and the autonomous provinces of **Vojvodina YU7** and **Kosovo YU8**. [YU9 and YU0 are special prefixes, used from various republics.] Should these entities remain together, and assert they are the legitimate heirs of the former Yugoslavia (as they have done to this point), they will **not** be a new DXCC country. The Partition Deletion Criterion clearly states: "The partition category is *not* employed when the original political entity continues in some form." Thus current YU1s, YU6s, YU7s, and YU8s will likely count as the old YU Yugoslavia.

Note that Yugoslavia has use of the prefixes of YU, YT, YZ, 4N, and 4O. YU has been used above for simplicity. Once the dust settles, the newly independent countries will ask the ITU for unique prefixes.

Note also that there are **no** petitions before the DXAC to add any new countries from former Yugoslavia, yet. Thanks to KC1YR and K1ZZ for help with the above.
